

### DID YOU KNOW?

Rehabilitation engineers design high-tech ways to make patients more comfortable and independent.

### DID YOU KNOW?

It takes at least two physicists to work out a safe treatment plan for your radiotherapy treatment.

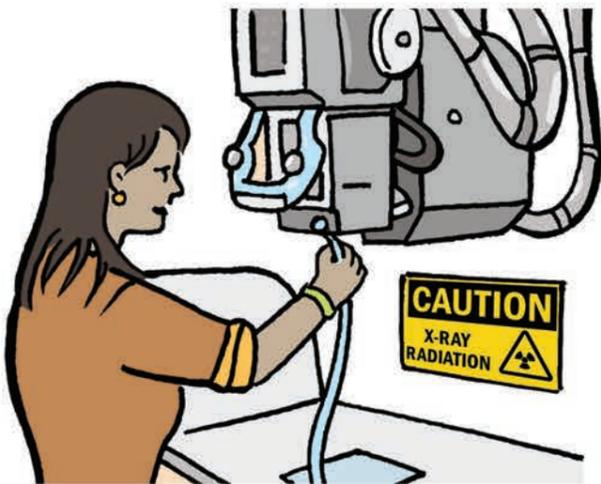

### DID YOU KNOW?

Academic scientists transform physics and engineering principles into leading edge healthcare research.

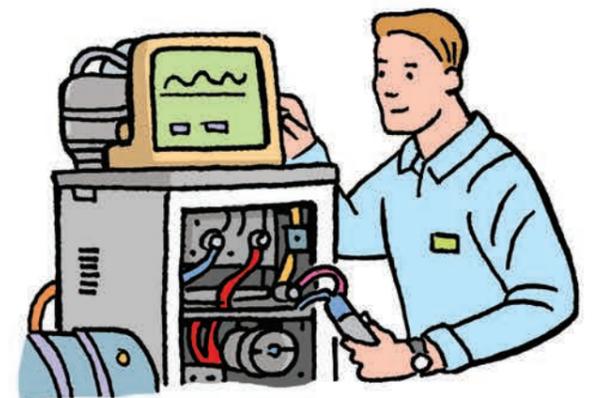

Without physics and engineering there would be no modern healthcare

### DID YOU KNOW?

Every piece of imaging equipment using x-rays is tested by a scientist to make sure it is safe.

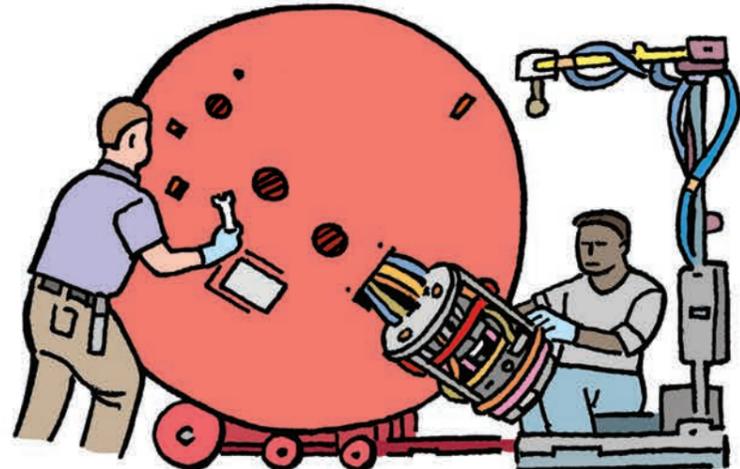

### DID YOU KNOW?

Teams of engineers and scientists check every machine in this hospital to keep them working properly.

### DID YOU KNOW?

A technologist is needed to perform some of the scans doctors use for your diagnosis.

### DID YOU KNOW?

Engineers and physicists in industry work together to develop the latest generation of radiotherapy treatment machines.
